

Visiting Doctoral Student Program 2024 Academy Complex Systems UCA^{JEDI} Université Côte d'Azur

About

The Academy Complex Systems of UCA^{JEDI} is launching a **visiting doctoral student program** that aims to allow students pursuing doctoral studies out of France, to be hosted for a duration of 1 to 3 months in a local team and collaborate on topics related to the study of complex systems.

The objective is to promote or strengthen an **emerging collaboration and/or to contact potential post-doctoral fellows.**

From the viewpoint of the young researchers, the idea is to **offer them the opportunity to** collaborate with researchers from other communities, to benefit from specific infrastructures in the hosting laboratory, and to develop their international professional network.

Eligibility criteria

Research teams interested in hosting an identified doctoral student are invited to apply.

To be eligible, young visiting researchers must:

- Be registered in a doctoral program in a foreign institution for the entire duration of their visit: an official document will have to be given;
- Develop or pursue during their visit a research activity in collaboration with a research team of Université Côte d'Azur or of the IdEx partners on a topic related to complex systems;
- Carry out a visit for a period between **1 to 3 months** (the planned dates should be indicated in the application: staring date <u>after March 1, 2024</u>, <u>end date before July. 15, 2025</u>)

Please note that visits aimed at promoting the emergence or strengthening of a collaboration will be given priority for funding. However, other requests will not be excluded.

Students may be accommodated at the <u>Faculty Club</u>, depending on availability at the time of their stay.

Evaluation criteria

Proposals for visiting doctoral students will be selected according to:

- the quality of the scientific project;
- the profile and skills of the doctoral student,
- the **added-value demonstrated** by this visit in terms of knowledge sharing or interdisciplinarity or prospective for a future postdoc;
- The relevance of the visit with regard to the activities of the host team (existing contracts, projects, establishment or strengthening of new collaborations...).

Eligible expenses

Eligible expenses **only include travel expenses missions** for the doctoral student and are limited to his/her transport, lodging, and food expenses.

The hosting teams and research units must commit to providing the visiting student with the necessary means to carry out the activities planned during his/her visit (in terms of supervision, work space, access to laboratory resources and equipment, consumables, etc.)

➤ The subsidy granted by the Academy is set to a maximum of 2.500€ per month, amounting to a maximum of 7.500€ per request. This allocation is not a scholarship intended for the student but rather a funding allocated to the project leader and their hosting team, aimed at facilitating the implementation of the mission.

Calendar

- Call open on the Nuxeo plateform from September 14, 2023 to November 15, 2023 (5 p.m.)
- Results communicated at the end of December 2023, beginning of January 2024.
- ➤ Visits starting from March 1, 2024.

Application conditions

- Applications will include:
- The application form below, duly completed;
- Curriculum vitae of the doctoral student with list of publications;
- The doctoral student's school certificate;
- 1 letter of motivation from the doctoral student, highlighting the link between his/her subject of study and complex systems;
- 2 recommendation letters;
- Any necessary additional documents

All application documents should be concatenated in a single PDF file named according to the following scheme: NAME of the project_Applicant Name_2024.pdf

Applications must be submitted on the Nuxeo platform by clicking on the following link: **Visiting Doctoral Program 2024**

1. Information on the stay, the local supervisor & the visiting doctoral student

Project title		
Last name, First name of the applicant/supervisor		
Email of the applicant/supervisor		
Laboratory / establishment of the applicant		
Reason for the stay (emergence or strengthening of collaboration, cosupervision of a thesis, anticipated post-doctoral position, etc.)		
Foreseen period of the visit	Start date:	End date:
Last name, First name of the doctoral student		
Email of the doctoral student		
Institute/Department/Laboratory of origin		
University in which the student follows a doctoral program		
Title of the doctoral thesis		
Grant requested from The Academy	€	

2. Summary

Summary of the context and scientific objectives - Any effort aimed at presenting the project to non-specialists will be duly appreciated (3000 characters max)		

3. Implementation

Work program and implementation of the visit (2000 characters max)		

Justification of the added value brought by this visit (2000 characters max)
