Editorial Fellowship for Innovations in Digital Health, Diagnostics, and Biomarkers

The *Innovations in Digital Health, Diagnostics, and Biomarkers* (IDDB) invites applications for two 1-year, part-time, volunteer editorial fellowships beginning August 1, 2022 from medical professionals who have an interest in medical publishing and digital health. Fellows will gain knowledge and skills in writing, peer reviewing, proofreading, and disseminating content via social media. Applications must be received by July 1, 2022.

Responsibilities:

- Attend virtual monthly Editor meeting to learn about medical journal office operations
- Attend virtual annual Editorial Board meeting
- Attend special webinars and read recommended educational materials to learn about publishing ethics, peer review, and tools for proofreading and content dissemination
- Peer review articles as assigned
- Engage in social media (create and share various types of content)
- Explore and introduce ideas that will increase the reach and impact of the journal

Requirements:

- Junior physician who has completed a residency program
- Willingness to perform above tasks and dedicate 1-4 hours per week for the Journal
- 2 or more publications in peer-reviewed journals is preferred

Fellows can work remotely from any location.

Please send curriculum vitae and a letter of interest to the Innovations Journals Editorial Office at editor@innovationsjournals.com by July 1, 2022.
