

IdEx Former Chairs

S. Nazarenko

Sergey Sergey Nazarenko is a CNRS senior researcher at Université Côte d'Azur. His research focuses on fluid dynamics, turbulence and waves, including wave turbulence, magnetohydrodynamic turbulence, superfluid turbulence, water waves, Rossby waves, vortices and jets in geophysical fluids, drift waves and zonal jets in plasmas, optical vortices and turbulence and turbulence in Bose-Einstein condensates.

In 2019, he received, in collaboration with Giorgio Krstulovic, a CNRS researcher at the J.L. Lagrange laboratory, an \$8 million research grant from the Simons Foundation in New York to study wave turbulence. Researchers in mathematics and physics are involved in this interdisciplinary and international research aimed at understanding and explaining wave turbulence.

C. Bouveyron

Charles Bouveyron is a Professor of Applied Mathematics (Statistics and AI) at Université Côte d'Azur and holds the Inria Chair in Data Sciences. He is a researcher and Associate Director of the 3IA Côte d'Azur Institute. He is a member of the Epione team and head of the Maasai team at Inria Sophia Antipolis.

His research interests include statistical learning (clustering, classification and regression) in high dimensions, adaptive statistical learning (uncertain labels, evolving distributions and novelty detection), statistical learning on networks, functional and heterogeneous data and applications of statistical learning (medicine, image analysis, chemometrics, human sciences, etc.)

E.A. Eroshva

Elena A. Eroshva is a Professor of Statistics and Social Work at the University of Washington and visiting researcher for 12 months at Université Côte d'Azur.

F. Castellaneta

Francesco Castellaneta is a professor of strategy and entrepreneurship at Université Côte d'Azur and SKEMA Business School. His research aims to understand how commercial organizations use, acquire, build and protect their resources in contexts of complex strategies

G. Lewkovicz

[Gregory Lewkovicz](#) is a Professor of Law at the Université Libre de Bruxelles and visiting researcher for 12 months at Université Côte d'Azur.

K. Benyekhlef

Karim Benyekhlef is a Professor of Law at Université de Montréal. He held a Chair of Excellence and was a long-term visiting researcher with the DL4T (Deep Law for Tech) project, funded by IdEx.
